

Recycling Options for Agricultural Plastics

Save money by avoiding landfill fees and recycle!

Agricultural Plastics accepted for recycling are clean plastic films and nursery containers or pots.

Plastic Films (greenhouse and row covers) *MUST* be

- Cleaned (minimal contact with ground),
- Exposed to only minimal numbers of years in sun,
- Collected in dry weather and stored under cover,
- Baled or compressed in a manner approved by recycler, and
- Cut off lower parts that have been in contact with the ground.

Nursery Containers (pots, cell packs & flats) *MUST* be

- Shaken clean of dirt.
- Sorted by plastic type (more valuable).

Start a Recycling Program:

1. Contact your supplier of pots and flats and ask for information on their take-back system.
2. Contact a Recycler/Broker to discuss your needs (best for several pallets or a truckload).
